## RoHS Compliance Statement

A Gilligan (Coatings) Ltd strive to stay abreast of all environmental regulations that relate to our industry. This document is intended to inform our customers about the company's ability to provide electrodeposited finishes which are RoHS compliant.

A Gilligan (Coatings) Ltd, at customer request, provides electroplated finishes free of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, polybrominated diphenyl ethers, pentabromodiphenyl ether and octabromodiphenyl ether.

As a long established standard in the electroplating industry, A Gilligan (Coatings) Ltd will continue to supply high quality finishes to our customers.

To the best of our knowledge and in compliance with their own certifications, none of our chemical or plating bath suppliers use these banned substances in their RoHS compliant products and A Gilligan (Coatings) Ltd do not intentionally add these banned substances to their plating solutions. Trace amounts of any chemical or substance may be found as impurities in any plating solution, but will not affect a product's RoHS compliance.
